

## **Backflow Testing Reminder**

Annual testing is due for all testable backflow prevention assemblies. If your property has a testable backflow device, please have it tested by a certified backflow tester.

Regular testing is required to help protect the public water supply by ensuring your backflow prevention device is working properly.

If you have questions about your backflow device or testing requirements, please contact the City of Cornelia Water Department. 706-894-3074.

For a list of certified testers contact Vicki Vinson at [vinson@cornelia.city](mailto:vinson@cornelia.city)

Thank you for helping keep our drinking water safe.
